Reporting @ COSMO – Where we stand

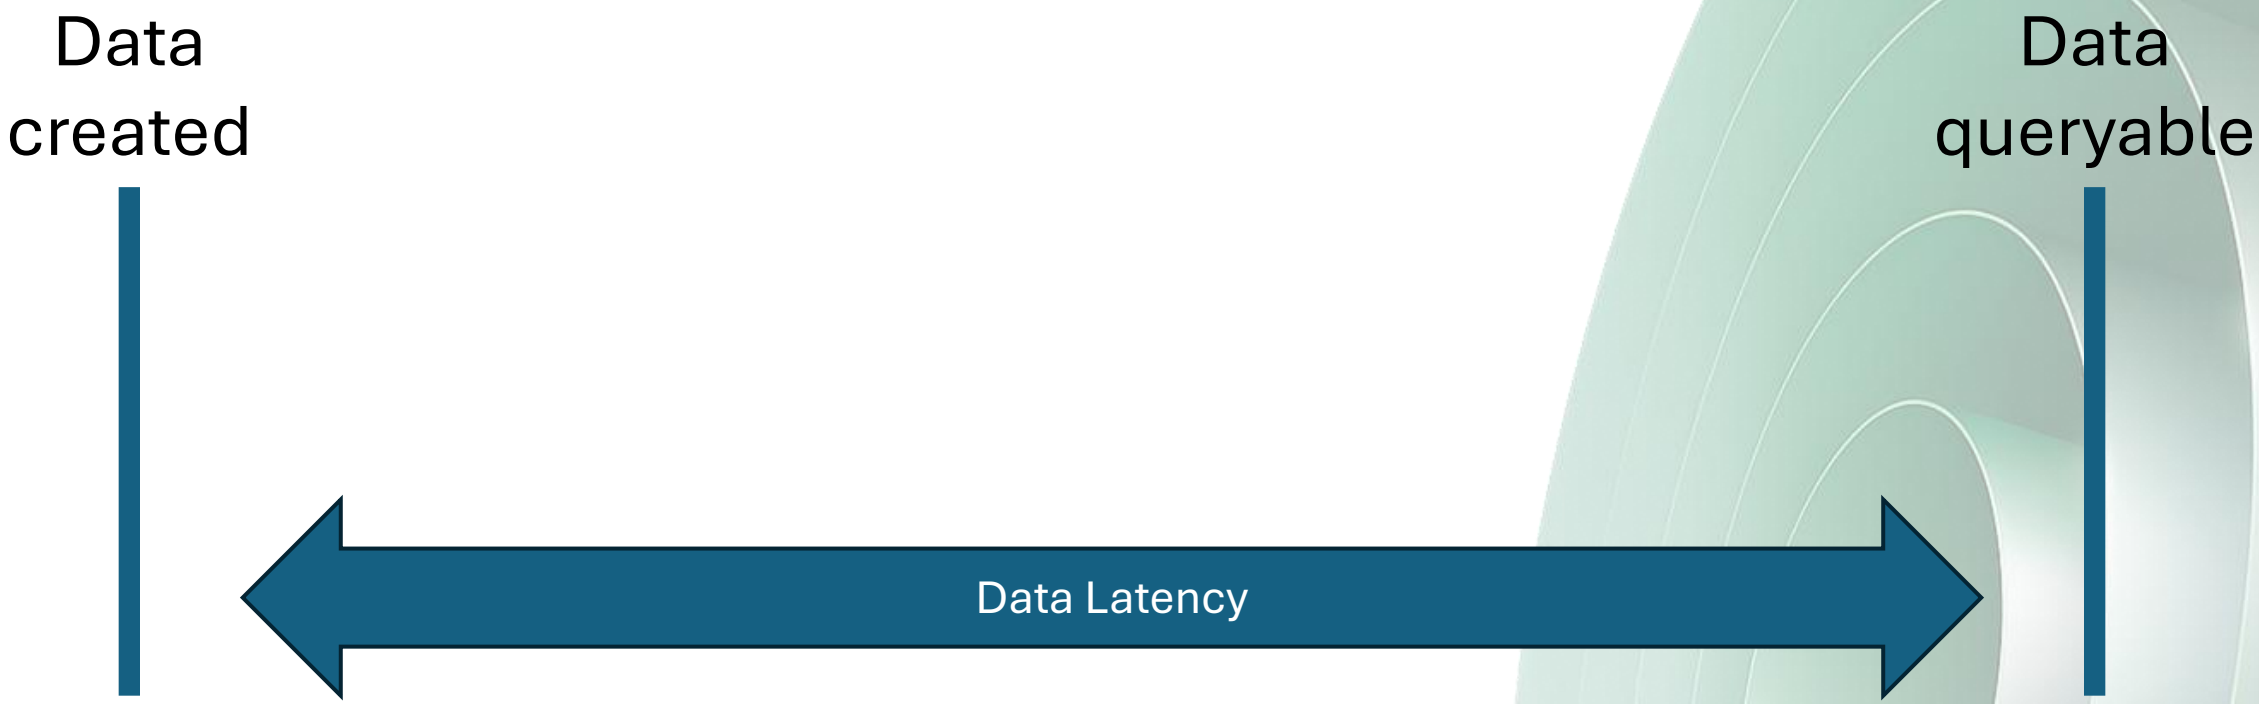

- Transformation with T-SQL Jobs (Stored Procedures)
- CDC-based mirroring (10 Tables)
- Data latency ~12 Minutes
- Query latency <10 sec

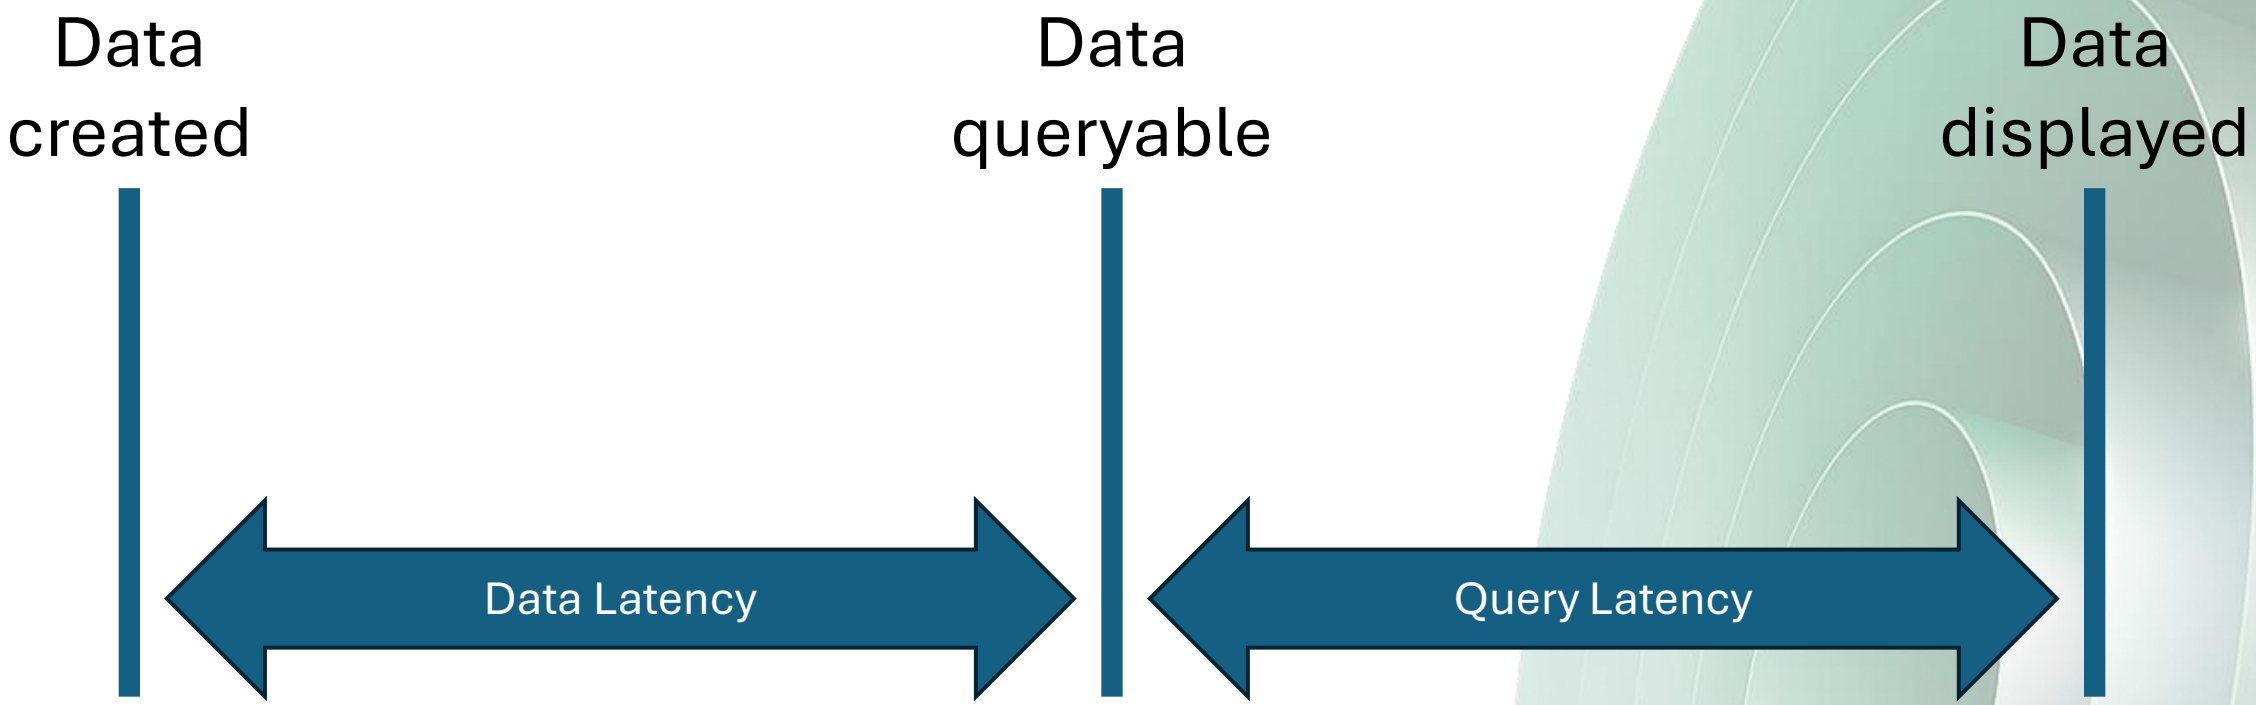

Performance

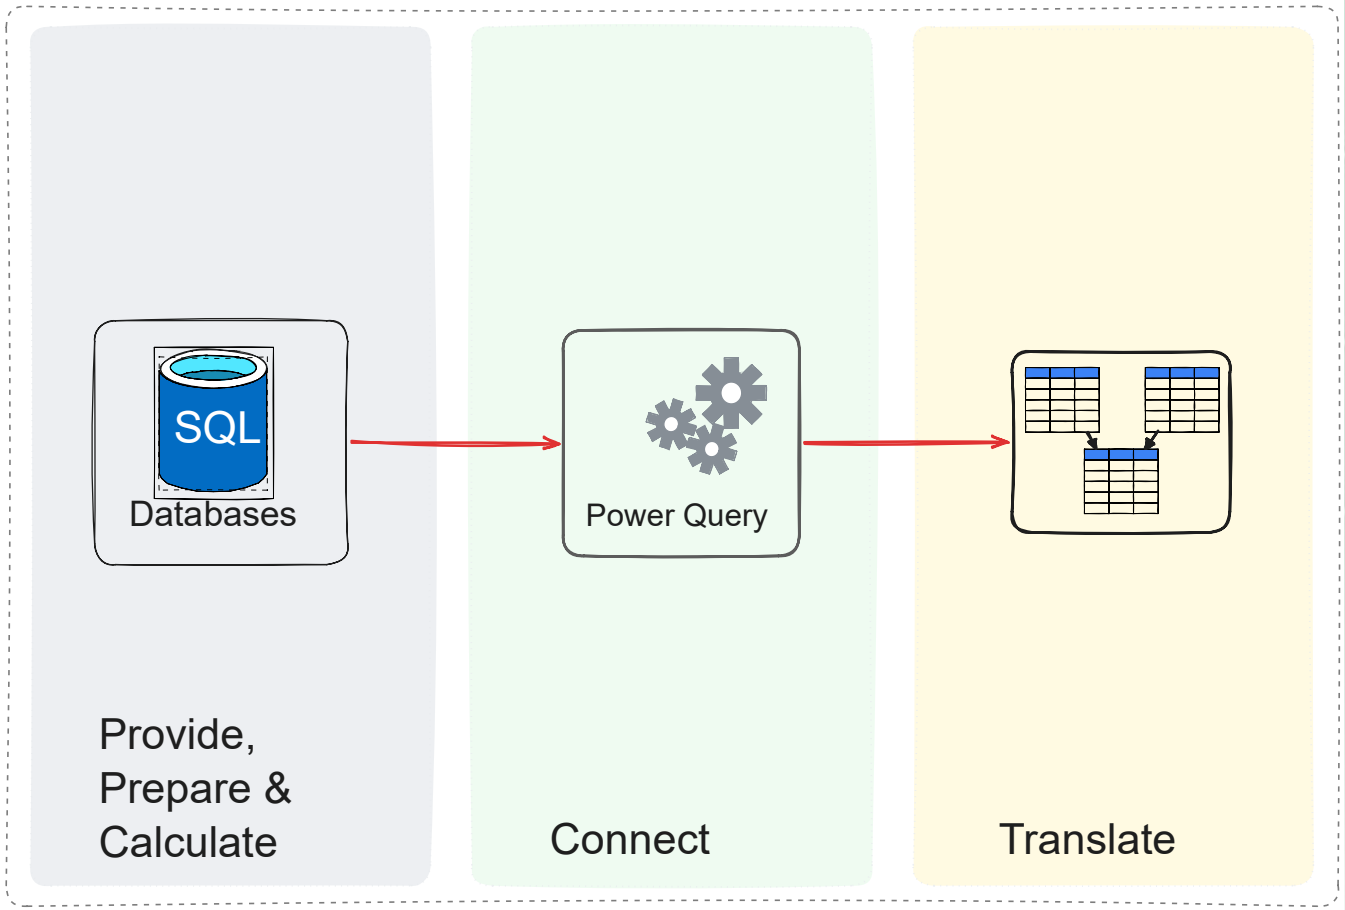

Performance

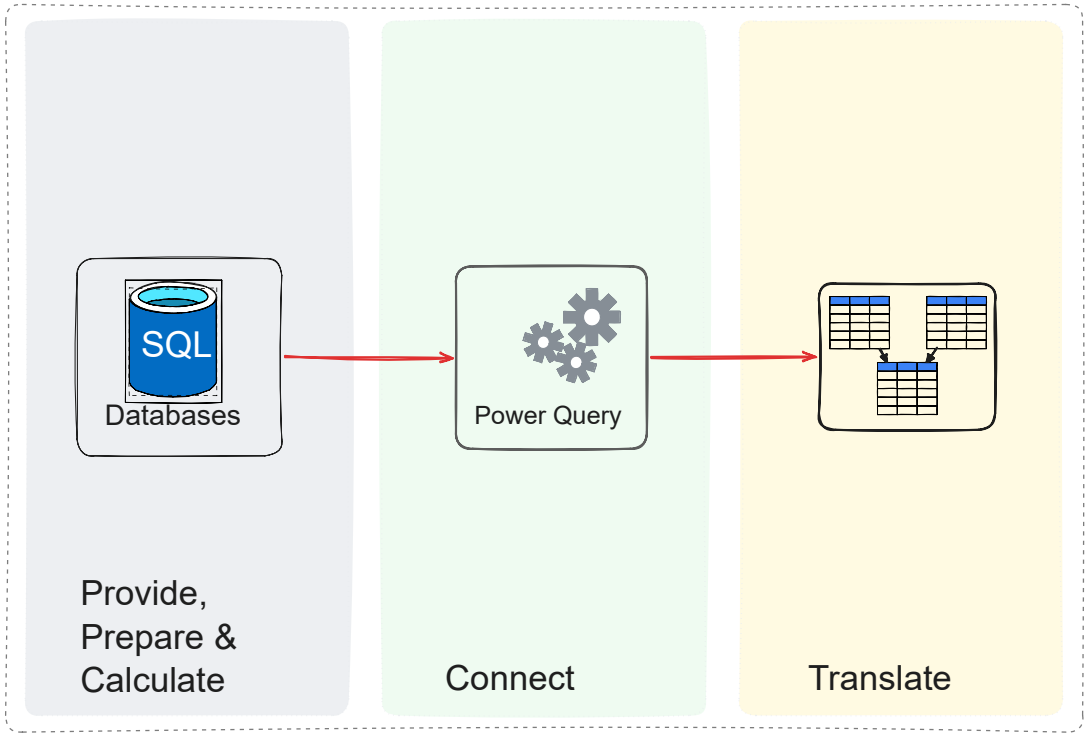

Performance

DirectQuery

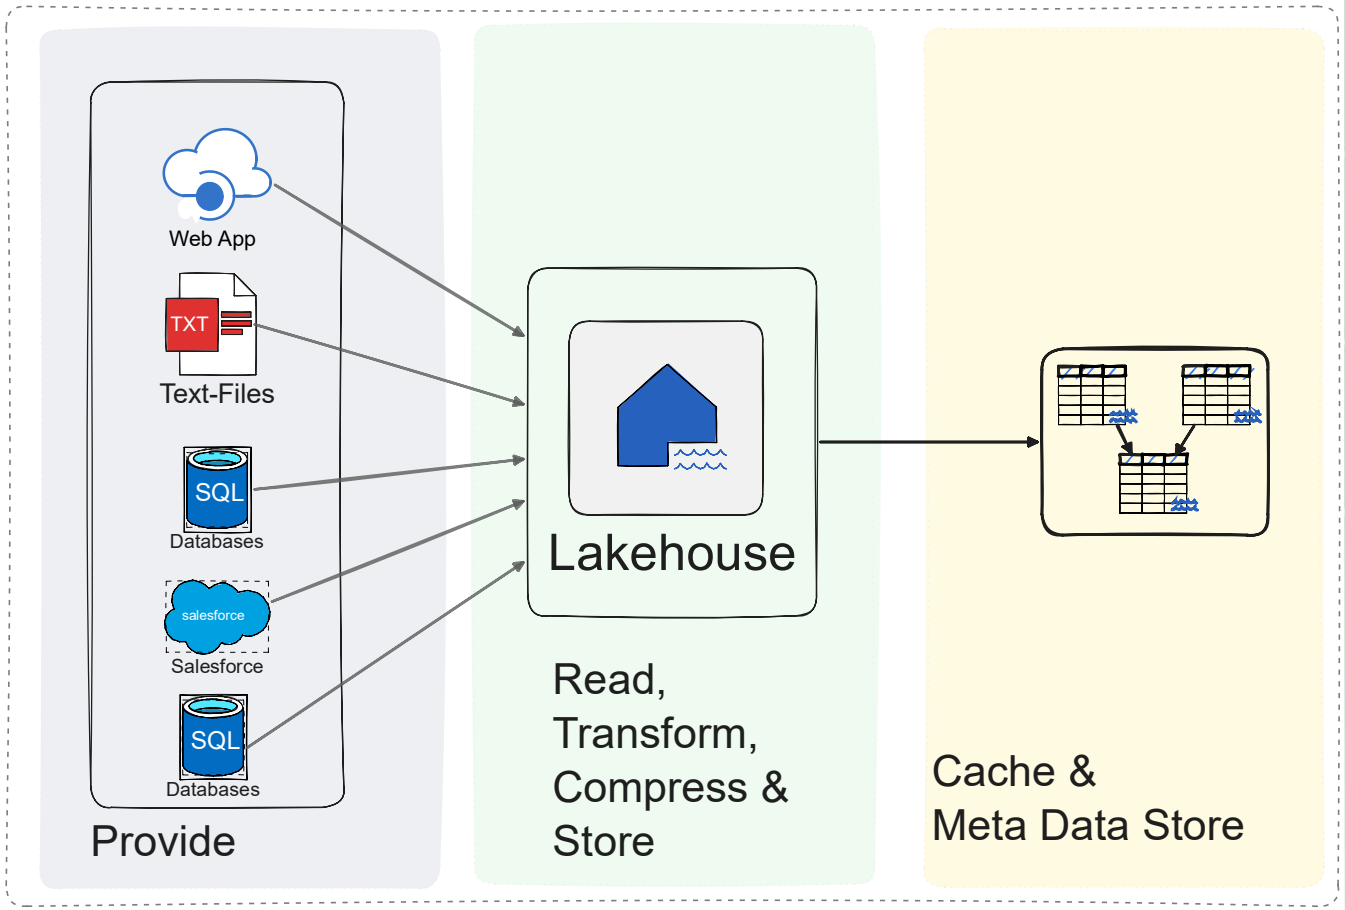

DirectQuery

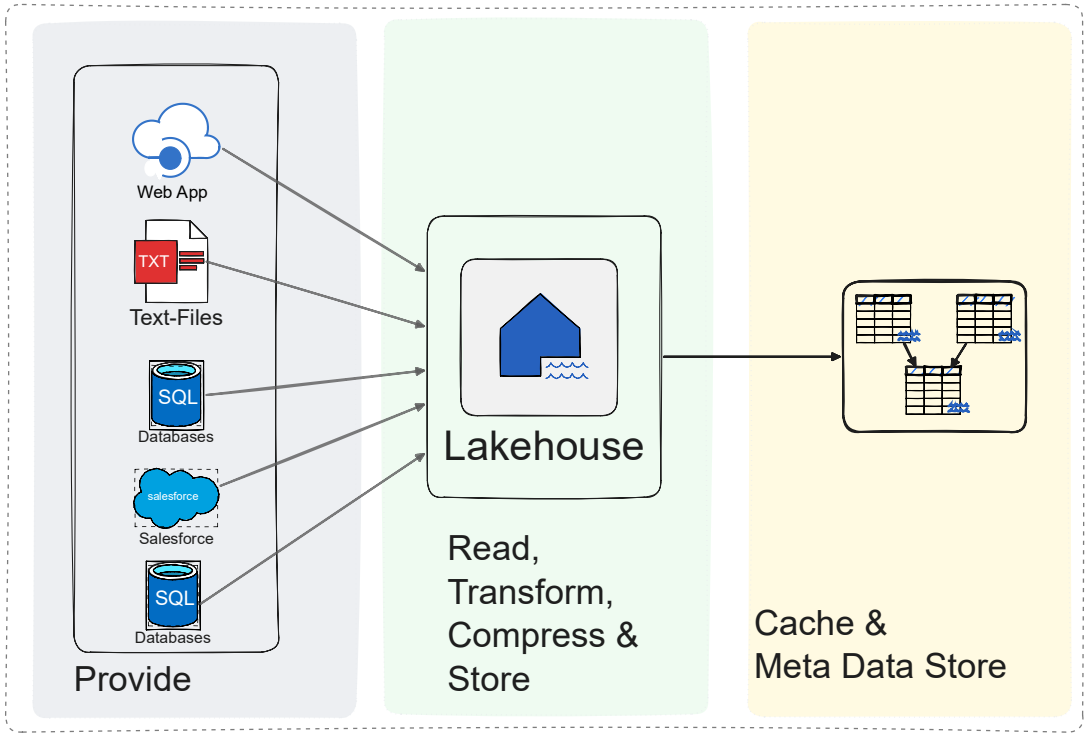

- Data stays at source & always up-to-date
- „no“ model size limits
- Data source security can be leveraged
- Limited DAX & data source support
- Calculated tables not supported

Direct Lake

Meta Data Store

Direct Lake

- Vertipaq engine
- Decouples import and query workload
- Model size limited by fabric capacity
- Data source security can be leveraged
- Limited support on calculated table

DEMO-TIME

Reporting @ COSMO – What we learned

- Review your transformations & DAX Code
- Keep an eye on new features
- Increased polling intervall on stale data (not documented for SQL Server)
- Acknowledge Fabric Guardrails
